

“Day in Life” Programme Application Process

The “Day in Life Programme” is now open for applications!

This program has already been developed for France and has been a great success with more than 50 registered again this year. Day in Life for France will end in a few days and it seemed appropriate to propose this program to all other business units across the Group.

As per previous communication, what are the objectives of “Day in Life Programme”?

This programme provides a great opportunity to:

- Discover a new job
- Understand the challenges and needs of colleagues
- Share information and learn from others
- Create social and professional bonds
- Improve internal communication
- Get a better vision of the organisation
- Create collaboration and break silos

Do you want to join the programme?

You can join the programme by completing the [participation form](#).

Please return the form to your local HR Business Partner by 31st December 2019.

Kind regards,

The Global HR Team
