

Splash for all Colart Employees Rollout coming soon

We are happy to announce that we are now working on rolling out Splash to the Colart employees that did not have access to the online HR tool yet. At Colart, we want all our employees to be able to access Splash and have an easy access to holiday tracker, communication and high-fives.

What's happening now?

Our focus is on employees that do not have a Colart email address, for example people working in our factories. We want to make sure they, too, have access to all the information they might need. We will create a generated email and profile for those people and make sure that there are computer workstation available for them to use, where they can easily log into their accounts.

What's Splash again?

If you have a doubt on what Splash is exactly, click on the image below to watch a short video (less than 5 minutes):
