

Amanda's idea Coronavirus

The novel coronavirus, which spreads from Wuhan to the rest of China, is on the nerves of every Chinese, including foreigners in China. People are quietly praying for Wuhan, hoping the disaster will be over soon. With the continuous understanding of this virus, its transmissibility and concealment constantly refresh people's cognition every day. The number of confirmed case in Tianjin is also increasing. Almost all enterprises can't return to work under the outbreak, because the gathering people will increase the risk of human-to-human transmission. In compliance with the call of the national and local governments, people can only stay at home, avoid going out with strangers, to prevent infection. The good news is that some domestic experts predict that a positive turning point may occur in a week. Although it is possible, we still silently pray for it to come soon.

Wearing masks is one of the most basic guarantees to prevent infection. The government proposed to provide sufficient masks for employees, which is also one of the conditions for returning to work. As a procurement personnel, I communicated with many domestic suppliers as soon as I received the company's purchasing task. But the outbreak was severe, the national government imposed requisition controls, concentrated resources where they were most needed, and there was a difficult situation in the markets of China, and of course there were frauds by unscrupulous traders. In this case, thanks to our group company, colleagues from France and the United States, who extended a warm hand to help CTAM purchase 4500 masks in the United States in foreign markets. Although I've heard that masks are also hard to buy in the markets besides China. 4500 masks will offer the hope to CTAM for a return to work. Currently the masks of 4500 pcs have been dispatched from America and CTAM is looking forward to their early arrival. American colleagues are still following up to buy more masks for CTAM. Special thanks to John Mendryk.

My feeling is that although the epidemic is serious, but as long as we unite as one, we can overcome the epidemic, Go Wuhan! Go China! Go CTAM!

从武汉延伸至全国的新冠病毒，牵动着每个中国人的神经，包括在中国的外国人。人们都在默默地为武汉祈祷，希望这场浩劫能早点过去。随着对这种病毒的不断了解，其传播性和隐蔽性不断刷新人的认知，天津的病例也在不断增多。疫情下企业无法复工，因为知道聚会会加剧传播和感染，顺应国家和当地政府的号召，我们只能呆在家里，避免外出和陌生人接触，防止被感染。好消息是有些国内

的专家预测，一周后可能会出现利好的拐点，虽然是可能，我们心里仍默默的祈祷，期待它能早日到来。

戴口罩是防止被感染最基本保障之一，政府提出给员工提供充足的口罩也是复工的条件之一，作为采购人员，接到公司的采购任务，第一时间和国内的多家供应商沟通。但是疫情很严峻，政府征用管制，把资源集中到最需要的地方，市场上出现了一罩难求的局面，当然也存在不法商贩的骗局。在这种情况下，感谢我们的集团公司，法国和美国的同事伸出了温情的援助之手，在同样口罩难求的国外市场，帮助CTAM在美国采购到了4500个口罩，解决了复工计划的燃眉之急。当前口罩已经发出，CTAM期待着这批口罩的早日到来。美国同事也仍在持续跟进为CTAM购买更多的口罩，在这里特别感谢John Mendryk。

我的感受是疫情虽然严重，但是只要万众一心，我们能战胜疫情，武汉加油！中国加油！CTAM加油！
