

Environmental Actions.

A Sustainability update from Le Mans

Sustainability Ambassador, Virginie Girard has made some significant inroads at our Le Mans site in driving environmental actions.

Working cross-functionally, the team initiatives help to support the overarching Colart Sustainability Strategy of enhancing the wellbeing of people and the planet through creativity.

Titled 'Environmental Actions' the Le Mans team focused on critical areas where they could make a real, sustainable difference. These areas included:

- Consumption and accidental pollution of water
- Accidental spills
- Energy consumption
- Waste generation
- Fire / Explosion
- Transport

The list of actions is extensive and impressive. They are a fine example of the difference that sustainability ambassadors make at Colart.
