

# China IT now reports to Global IT

## A message from our Chief Technology and Digital Officer

I would like to announce that Charles Liu and his team will be joining the global IT team. With this change, Charles will report directly into myself enabling closer engagement as a member of the technology team. This is an important step as we upgrade the Tianjin site, installing M3 and making significant investments so improving their infrastructure and systems. The move will allow us to fully align on IT strategy in addition to responding to the strategic technology needs of both the Tianjin site and wider China business to ensure these needs are properly represented and delivered. Please join me if wishing Charles and his team every success for the challenges ahead.

Thanks,

**Toby.**
