**ENHANCING THE WELLBEING OF PEOPLE
AND PLANET THROUGH CREATIVITY**

SUSTAINABILITY TOWN HALL

ENERGY

Reducing our energy consumption and increasing our renewable energy

18% increase in renewable purchased energy YTD (April)

28.6% increase in consumption

WASTE

Target to reduce our hazardous waste by 50%

Currently an increase +47.2%

Challenges – we are a chemical manufacturer with continuing regulatory constraints. Any product waste is classed as hazardous including liquid waste.

Future Investment in Le Mans to reduce the amount of liquid waste by evaporation to decrease the quantity of hazardous waste

Continuous improvements across all sites

PLASTIC PACKAGING

Sustainable packaging guidelines rolled out

Key projects in place to remove / reduce / reuse / recycle packaging

Legislative changes across Europe will have a big financial impact

SOCIAL IMPACT

- Every employee can dedicate **up to one day per year** on community activities.
- **Charity donation program.**
- **Social responsibility** through our supply chain.
- **Health Safety & Wellbeing**

What's Next

CO2 emissions – Setting targets to achieve Climate Neutrality

LCA – understanding the full impact of our products

Circularity – closing the loop

B Corp

Sustainable Innovation – alternative materials

Your Role

- We have Sustainability ambassadors across most sites
- Familiarise yourselves with the SDG'S
- Every individual in the business has a part to play

SUSTAINABLE DEVELOPMENT GOALS
